

GRAPHTEC

NEW

Enhanced Graphic Design & Cut Software

Graphtec Pro Studio Plus

Upgrade your cutting!

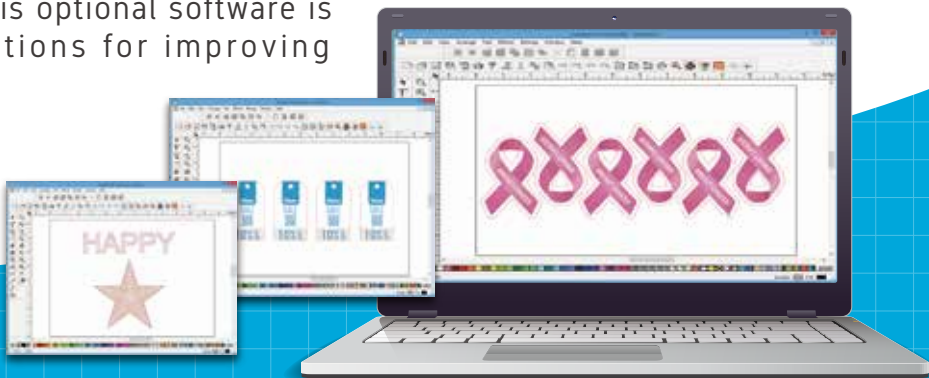

Graphtec Pro Studio Plus is the enhanced edition of Graphtec Pro Studio software. This optional software is equipped with advanced functions for improving productivity and design creation.

Compatible OS : Windows 10 / 8.1 / 8 / 7

NEW LINEUP Limited Edition Software

Graphtec Pro Studio Plus for Rhinestone

Graphtec Pro Studio Plus for Auto Nesting

Reduce Costs

Add Creativity

More Savings

Rhinestone Creation

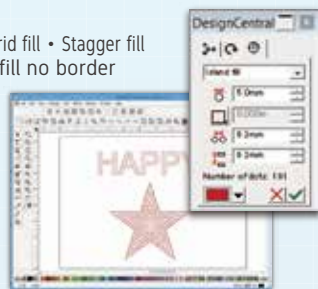

Graphtec Pro Studio Plus for Rhinestone

Graphtec Pro Studio Plus

Easily create rhinestone designs by selecting one of 8 presets, setting the hole size, and the pattern.

<Rhinestone Fill>

Center of path • Path points • Along path • Grid fill • Stagger fill
Island fill • Grid fill no border • Stagger fill no border

Nesting

Graphtec Pro Studio Plus for Auto Nesting

Graphtec Pro Studio Plus

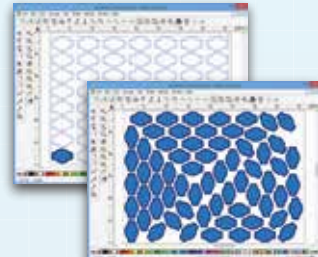

Objects are automatically arranged for higher yield and faster production. There are three types depending on your needs. (Nesting / True Shape Nest / Smart Nest)

3 pieces

Nesting

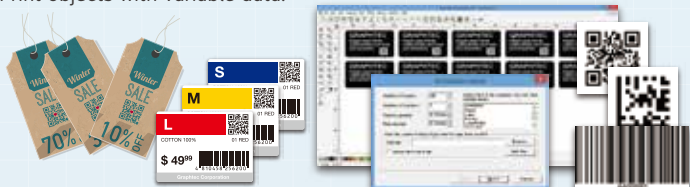

6 pieces

Easy to create Serialized number, Bar-code, QR code, etc.

Graphtec Pro Studio Plus

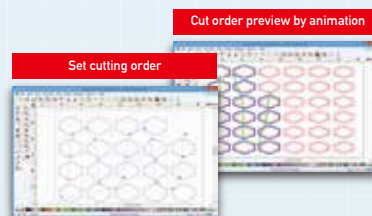

Create coded patterns such as a bar-code, QR code, and data matrix code. Print objects with variable data.

Cutting simulation (Changing cutting order)

Graphtec Pro Studio Plus

The cutting order of objects can be set automatically or manually. This improves productivity by reducing cutting time and prevents problems when cutting certain materials.

COLOR TRACING

Graphtec Pro Studio Plus

Graphtec Pro Studio Plus generates vector data for each color used from color bitmap images.

It is able to create cut data for each color of the bitmap image, then different cutting conditions can be assigned for each color.

Deformation, shadow, and stripe texts / shapes.

Graphtec Pro Studio Plus

Easily deform and decorate text and shapes with the transformation, shadow, and stripe functions.
